to me

Dear Mr. Faraz Chamani and dear friend,

I extend my warmest greetings to you on behalf of IC METACOGNIS and in my personal name, expressing my gratitude for your hospitality, willingness to collaborate, and assistance.

As per our agreement during the meeting at the Embassy of the Islamic Republic of Iran, I am sending you this brief note regarding the potential for cooperation between the Islamic Republic of Iran and the Republic of Serbia.

Due to our geopolitical position and our historical role in the establishment and organization of the Non-Aligned Movement, we maintain strong political, economic, and scientific ties with countries in Africa and South America. We believe that Serbia could serve as a gateway for cooperation and distribution of Iranian products, and together, we can realize significant potential in economic and scientific fields through joint projects.

For the EU market, there is a substantial demand for the following types of goods from Iran:

- Construction steel (all types of reinforcement)
- Construction structures (profiles and prefabricated structures for industrial halls or modular facilities for commercial, cultural, and sports purposes)
- Construction materials (cement, marble, gypsum)
- Special types of steel (tool steel, high-alloyed, etc.)
- Non-ferrous metals
- Parts and mechanical assemblies for hydropower plants
- Parts and mechanical assemblies for wind power plants
- Parts and mechanical assemblies for smaller thermal power plants (natural gas-based)
- Parts and assemblies for agricultural machinery
- Parts, assemblies, and complete construction machines
- Pharmaceutical and cosmetic products
- Motor oils and lubricants

This list of goods is also relevant for African markets. With countries such as Nigeria, Ghana, Senegal, and Burkina Faso, we have agreements on cooperation and technology transfer programs. Additionally, for African markets, there is a significant need for food products (all types of food) as well as agricultural machinery and equipment for processing agricultural products.

In the mentioned countries, we can facilitate agreements for substantial investment projects in areas such as railways, infrastructure (construction of schools,

kindergartens, hospitals, and equipping medical centers for primary and secondary healthcare), energy (construction of production capacities for generating electricity from natural gas, solar energy, and wind energy), electricity transmission, and IT solutions for controlling and organizing the production, transport, and consumption of electricity.

For the Iranian market, we can supply goods from Serbia, the EU, and African countries in the form of finished products or raw materials for further processing.

An interesting offering from Serbia includes high-quality agricultural seeds:

- Seeds for wheat, corn, rye, soybeans, and rice
- Potato seeds and other vegetable seeds
- Certified planting material and fruit seedlings grown in guaranteed ecological conditions

Agricultural products such as wheat, corn, flour, pasta (spaghetti, macaroni, noodles, etc.), small-scale agricultural machinery, spare parts for agricultural machinery, all types of machine parts with an emphasis on various bearings for the machine industry, and hydraulic and pneumatic equipment for agriculture (irrigation pumps, small, medium, and large capacity well pumps), as well as for the automotive industry, transport, and specialized high-pressure pumps, are also available.

Additionally, we can offer electronic components and assemblies (specialized chip designs tailored to client specifications or designed and manufactured by our experts upon request) and IT products (development and implementation of software solutions for digitalization and automation of production processes, administration, management, and operation of production processes and machinery).

Thank you for your willingness to assist and collaborate. I hope we will soon take the first steps toward realizing our planned activities.

As I have mentioned, our immediate priority is an agreement on the procurement of cement and its transportation to Serbia.

I kindly request that you review this letter and respond at your earliest convenience.

Kind regards,

С поштовањем,

С уважением,

Јовица Петровић
